WEBSITE SPECIFICATION DOCUMENT

✓ Website Objective and Goal

‘STUDY WITH ABBY CAFÉ’ is not like other cafés, it functions much like a library by offering a quiet space where customers can study, focus but with added comfort of good affordable meals and beverages.

The website is an accessible online platform made not only to advertise itself and supports its business but to also communicate about its operating hours and offerings clearly. It also collects feedback from its customers to improve the café’s experience while abiding the saying; *‘a happy customer is a happy business’*.

In relation to the business, the website serves as an engagement and informational tool. It helps potential customers to know about the café and helps them to decide when to visit while looking at the café’s operating hours. It also helps them stay informed about any changes and promotions.

✓ Target Market and Relation to the business

The café’s website offers reasonable and affordable prices to its customers as well as offers good food, beverages and good environment.

The target market for this café is typically all university students nearby. They depend mostly on the student living allowance, low-income part-time jobs or even parents. The café is made in such a way that it offers a study friendly spaces, food and beverages for this type of group all under student budget.

Nowadays students are familiar with the use of the internet, they are comfortable using it. Most of them own smart phones and browse through the internet daily and likely to visit the café’s website through their phones.

✓ Website type

The website is an informational and engagement tool kit that currently shares the story of the café, what it offers, how one can locate it and provides a simple form to gather customer feedback.

✓ Information Design & Taxonomy

This website consists of 5 pages; the home, menu, about, contact and feedback. It is made in such a way that every page is accessible within a single click across every page through a shared navigation bar.

The following is a list of 5 pages with a short description of its purpose;

- **index.html:**

This is a welcoming page that intrudes the café and shares about the operating hours.

- **menu.html:**

This page shares what the café offers in terms of food and beverages and how much they cost.

- **about.html:**

A short story about the that talks about the café, its founder and who is it for.

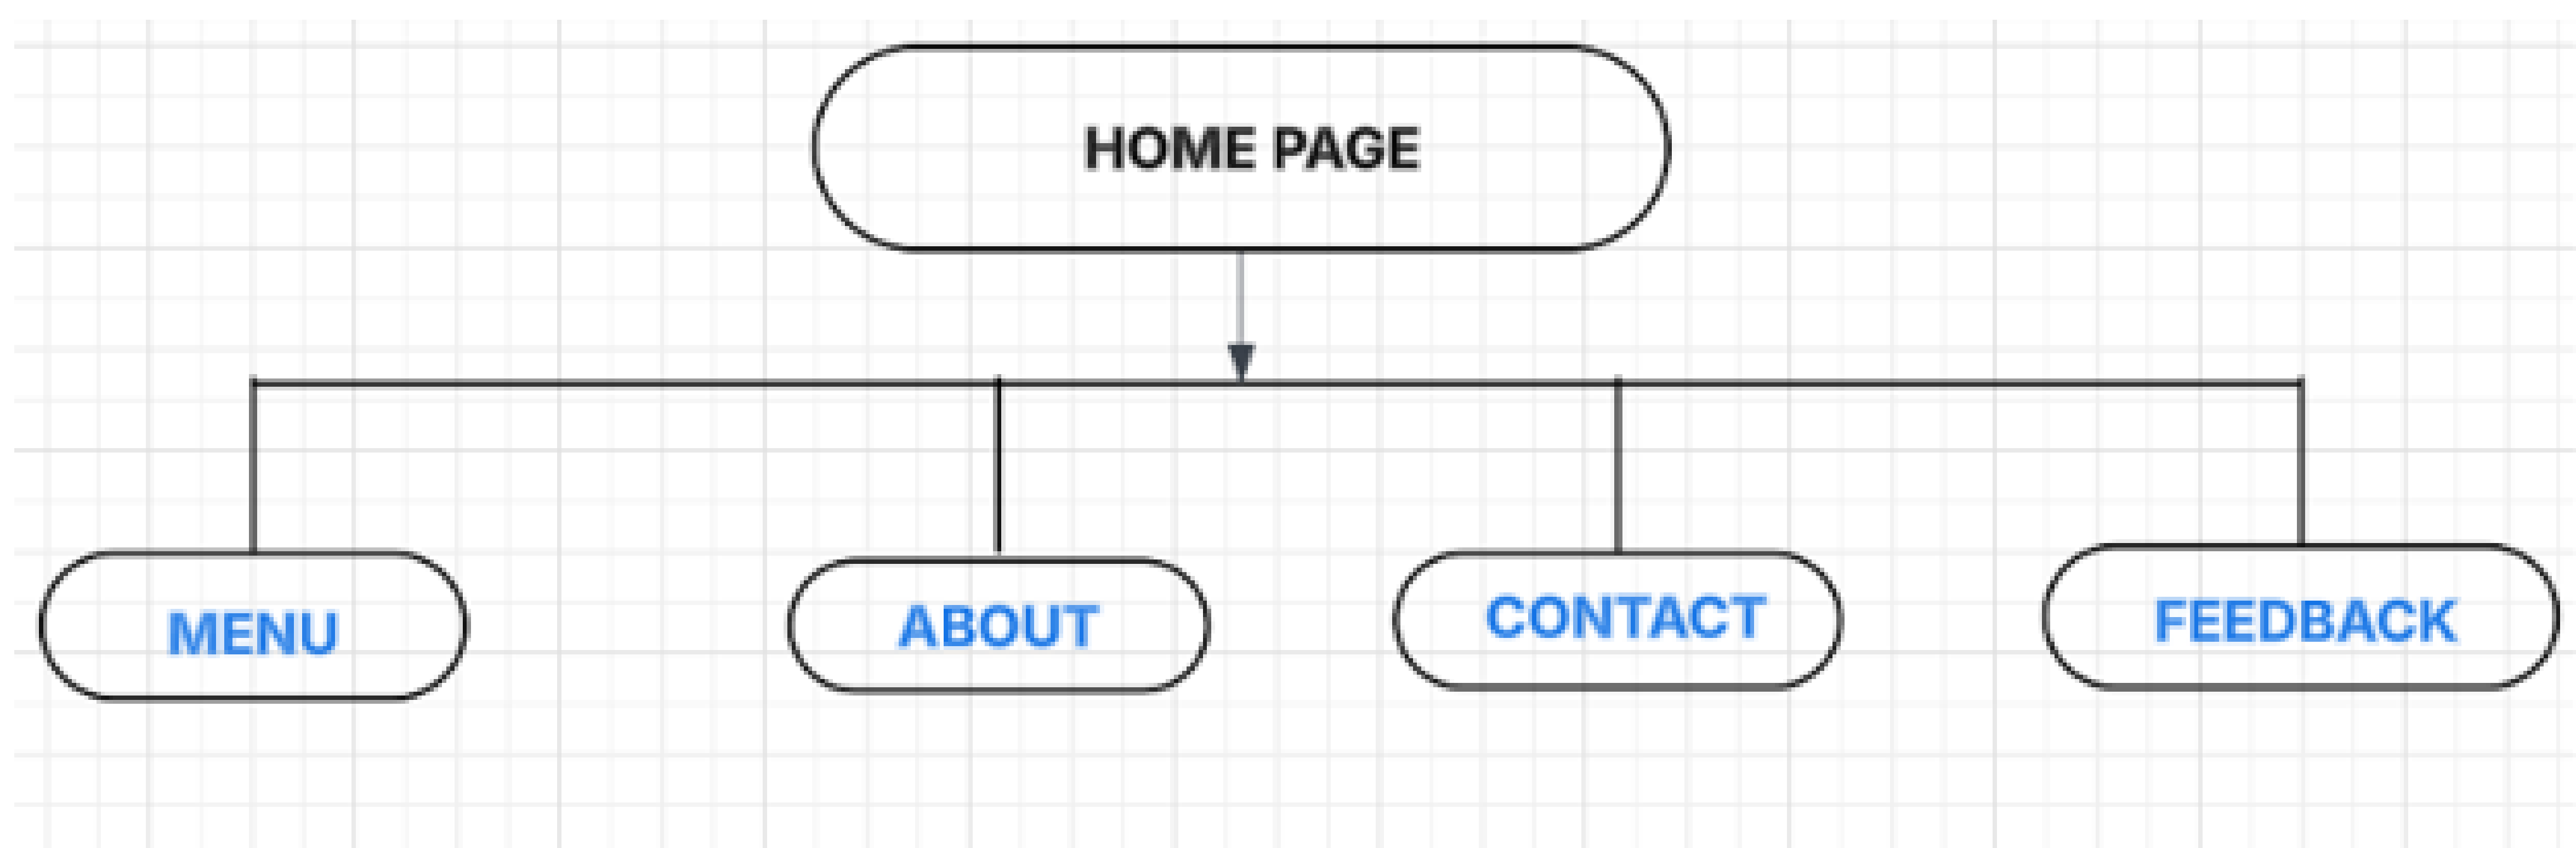

- **contact.html:**

Offers ways to locate and contact the café via email, phone numbers and provides working hours.

- **feedback.html:**

A form meant for customers to share their suggestions and ideas.

Below is a site map of 'STUDY WITH ABBY CAFÉ'

✓ Technical Brief

The website is built using GitHub and Visual Studio Code with incorporation

Of CSS3, HTML5, Bootstrap and JavaScript.

Html:

```
<form id="feedbackForm" action="#" method="get">

  <label for="name">Full Name</label>
  <input type="text" id="name" name="name" required>

  <label for="email">Email Address</label>
  <input type="email" id="email" name="email" required>

  <label for="subject">Subject</label>
  <input type="text" id="subject" name="subject" required>

  <label for="message">Message</label>
  <textarea id="message" name="message" rows="5"></textarea>

  <button type="submit" class="btn btn-success rounded-pill px-4">Submit -></button>
</form>
```

<form> tag creates the feedback form

Action="#" keeps the person on the same page

Method="get" sends the form information.

CSS:

```
.menu-col h2:first-child {
  margin-top: 0;
}

.menu-col p {
  font-size: 15px;
  padding: 6px 0;
  color: #E6D5C3;
}

.menu-photos {
  flex: 1;
}
```

.menu-col h2: first-child removes the top gap from the first heading.

.menu-col p sets the text size and color for menu items.

Flex: 1 stretches the photo to fill its space.

Bootstrap:

```
<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
```

This is a link to the bootstrap library to the feedback page. It loads it's ready made style from the internet so that the website can use it without any download.

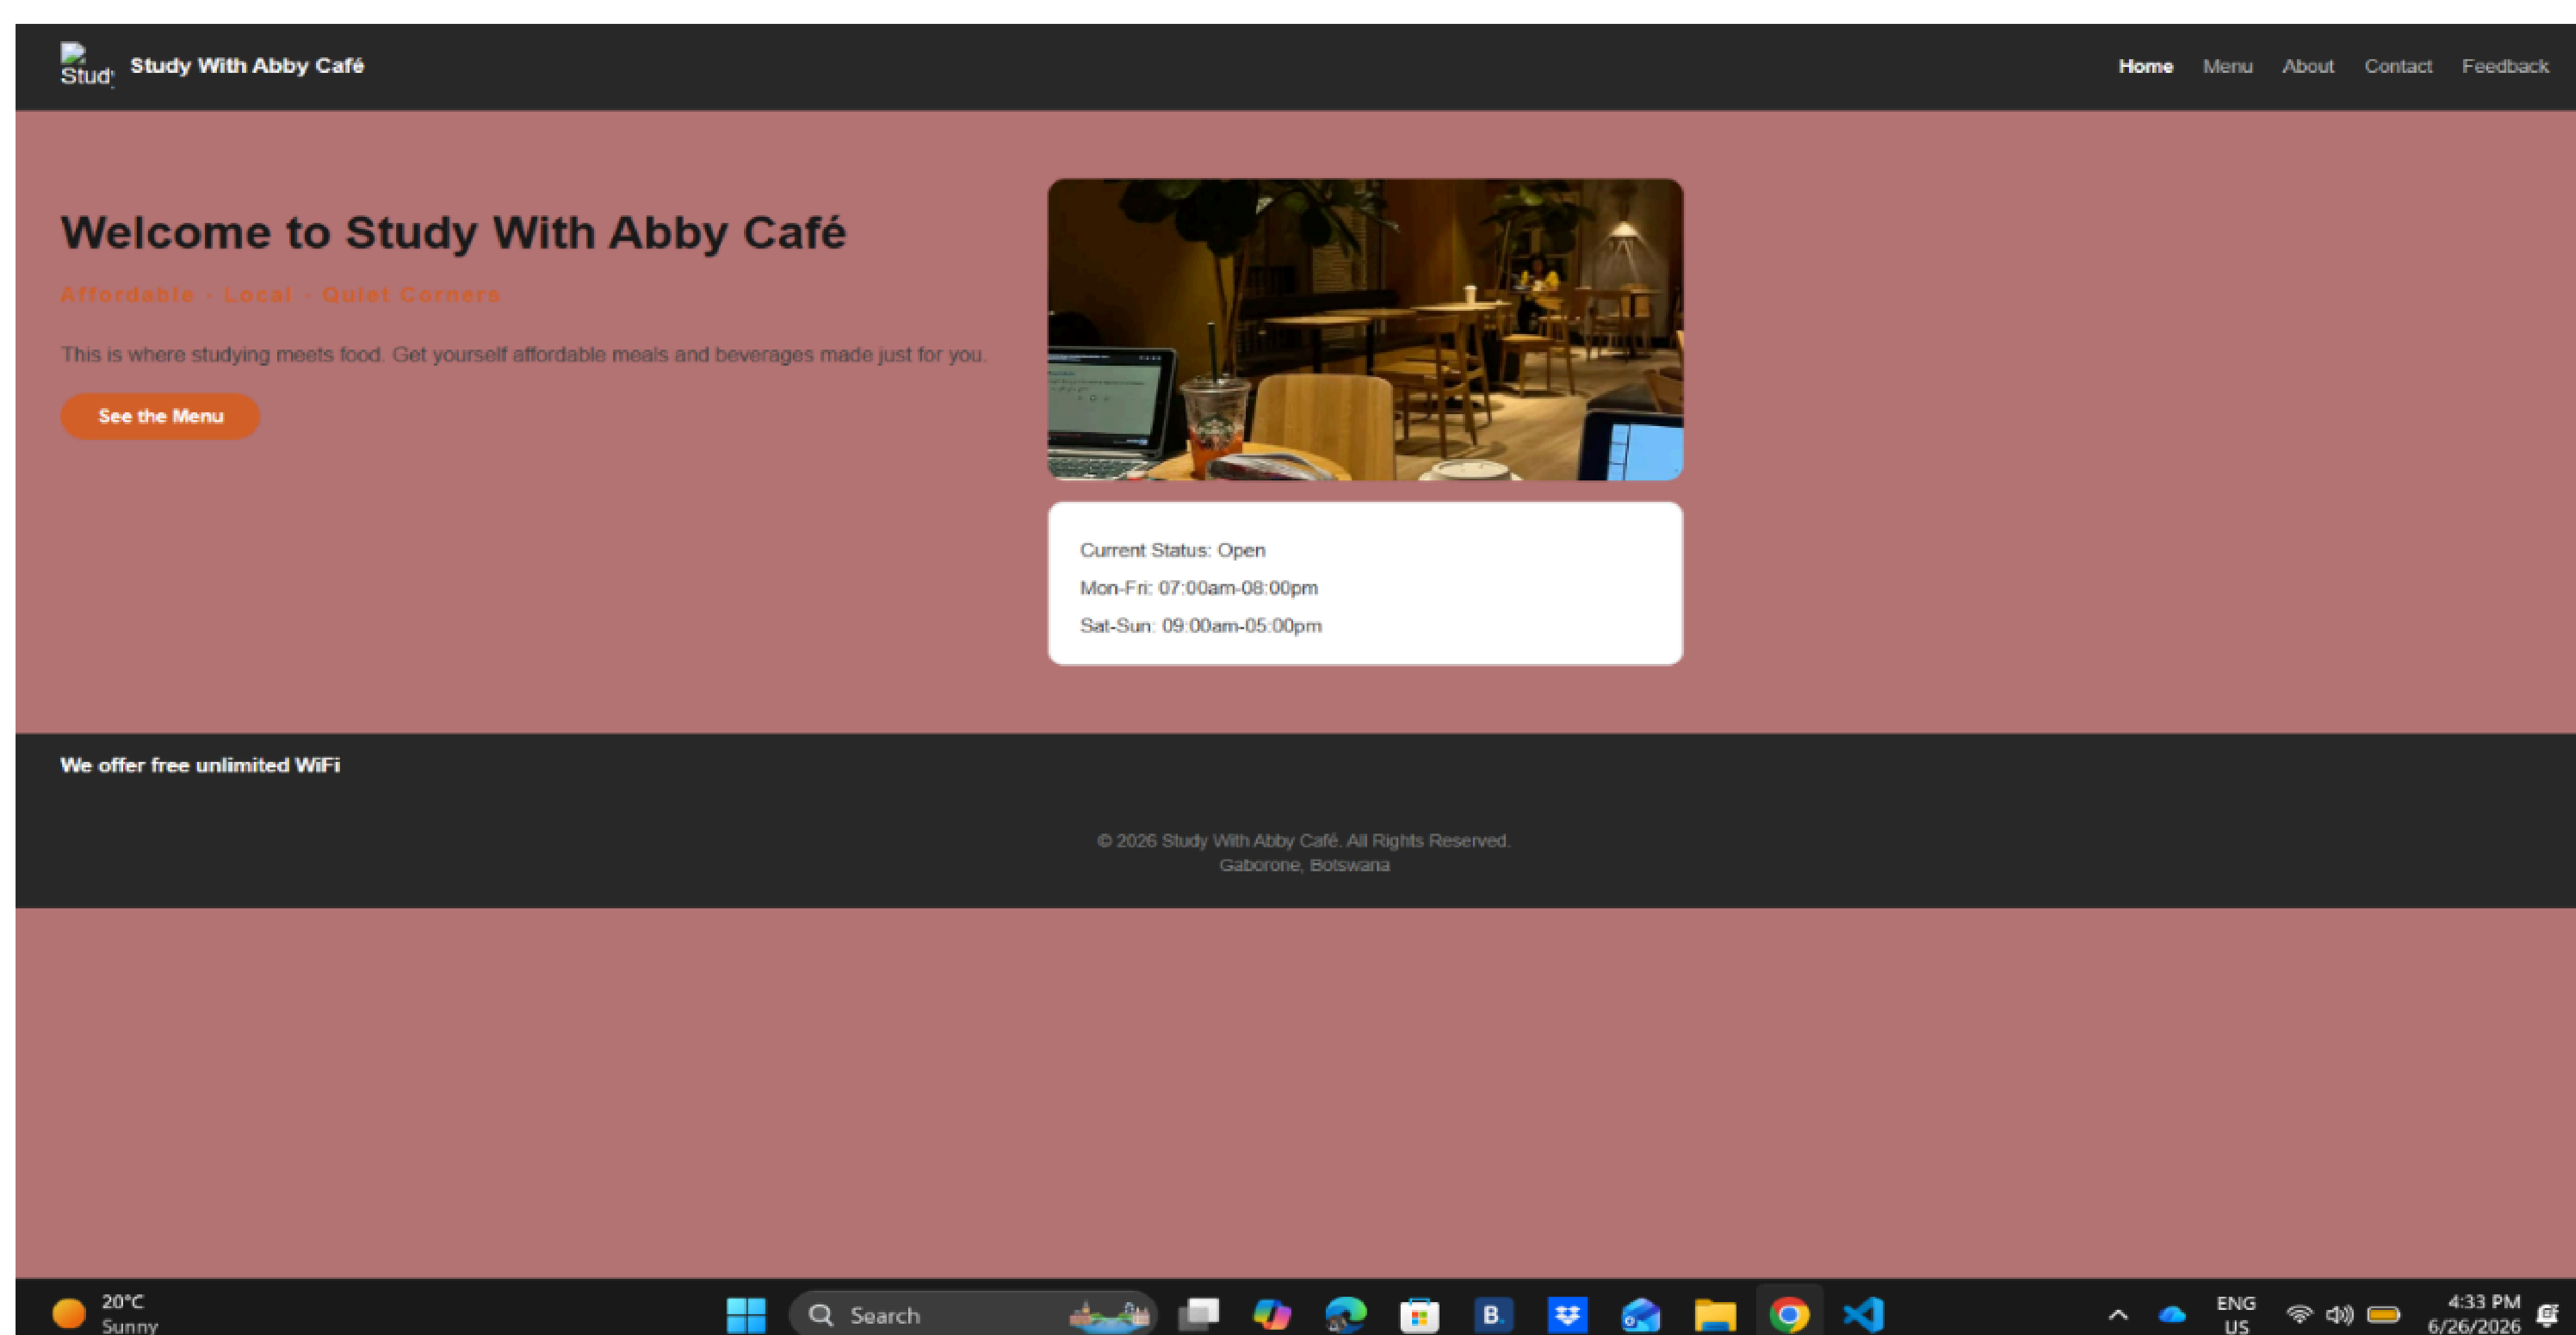

JavaScript:

```
<script>
  <!-- this is javascript that shows a thank you message popping up right after the user submits the feedback-->
  document.getElementById("feedbackForm").onsubmit = function(event){
    event.preventDefault();
    alert("Your feedback is highly appreciated. Thank you for your time!");
  };
</script>
```

This make the feedback form to be interactive. Immediately when the user click submit button, preventDefault() stops the page from refreshing.

Alert() shows the message that will pop after clicking submit button.

PROBLEMS ENCOUNTERED WHILE MAKING THE WEBSITE

- The footer was floating mid-air and not sitting perfectly at the

bottom of the pages. It was floating on every page.

I resolved it by using flex: 1 so that it sits and stretches itself all the way to the bottom of the page.

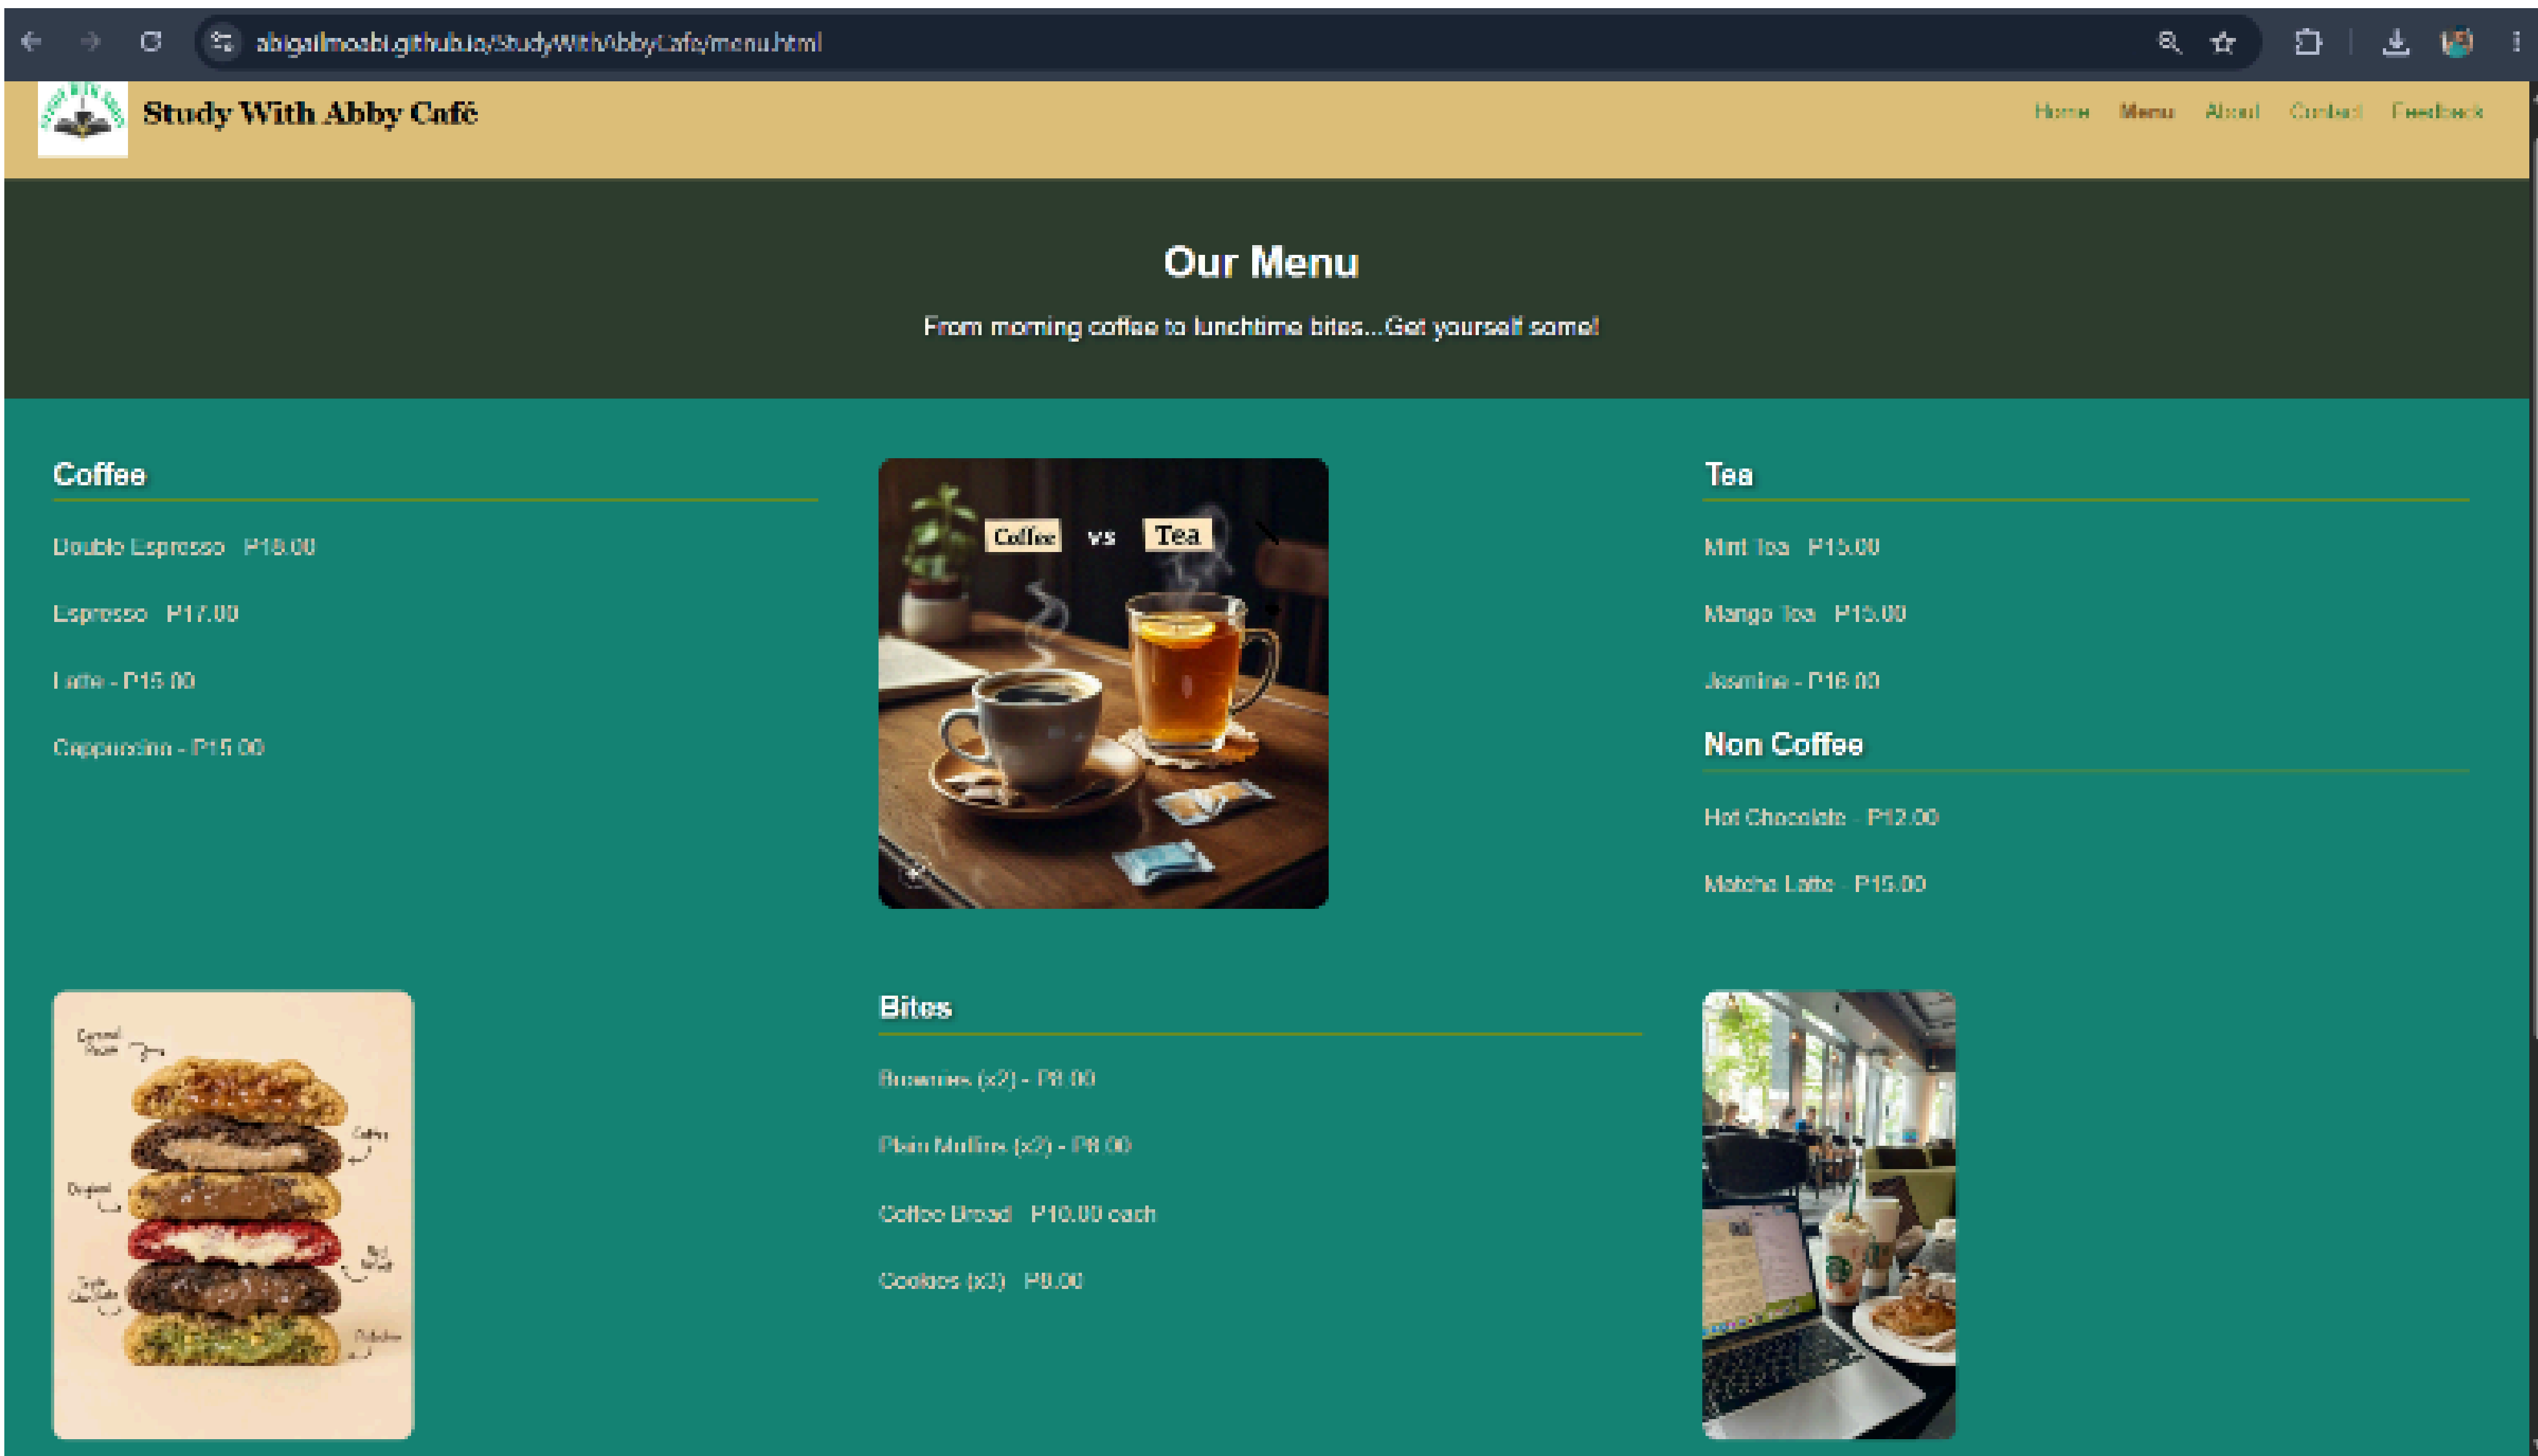

- The images size where an issue to adjust to a good size especially the image at the index.html. It was stretched and way too big.

I solved this by adding the line `height: auto;` so it doesn't look stretched and reduced the pixels to reduce the size of it.

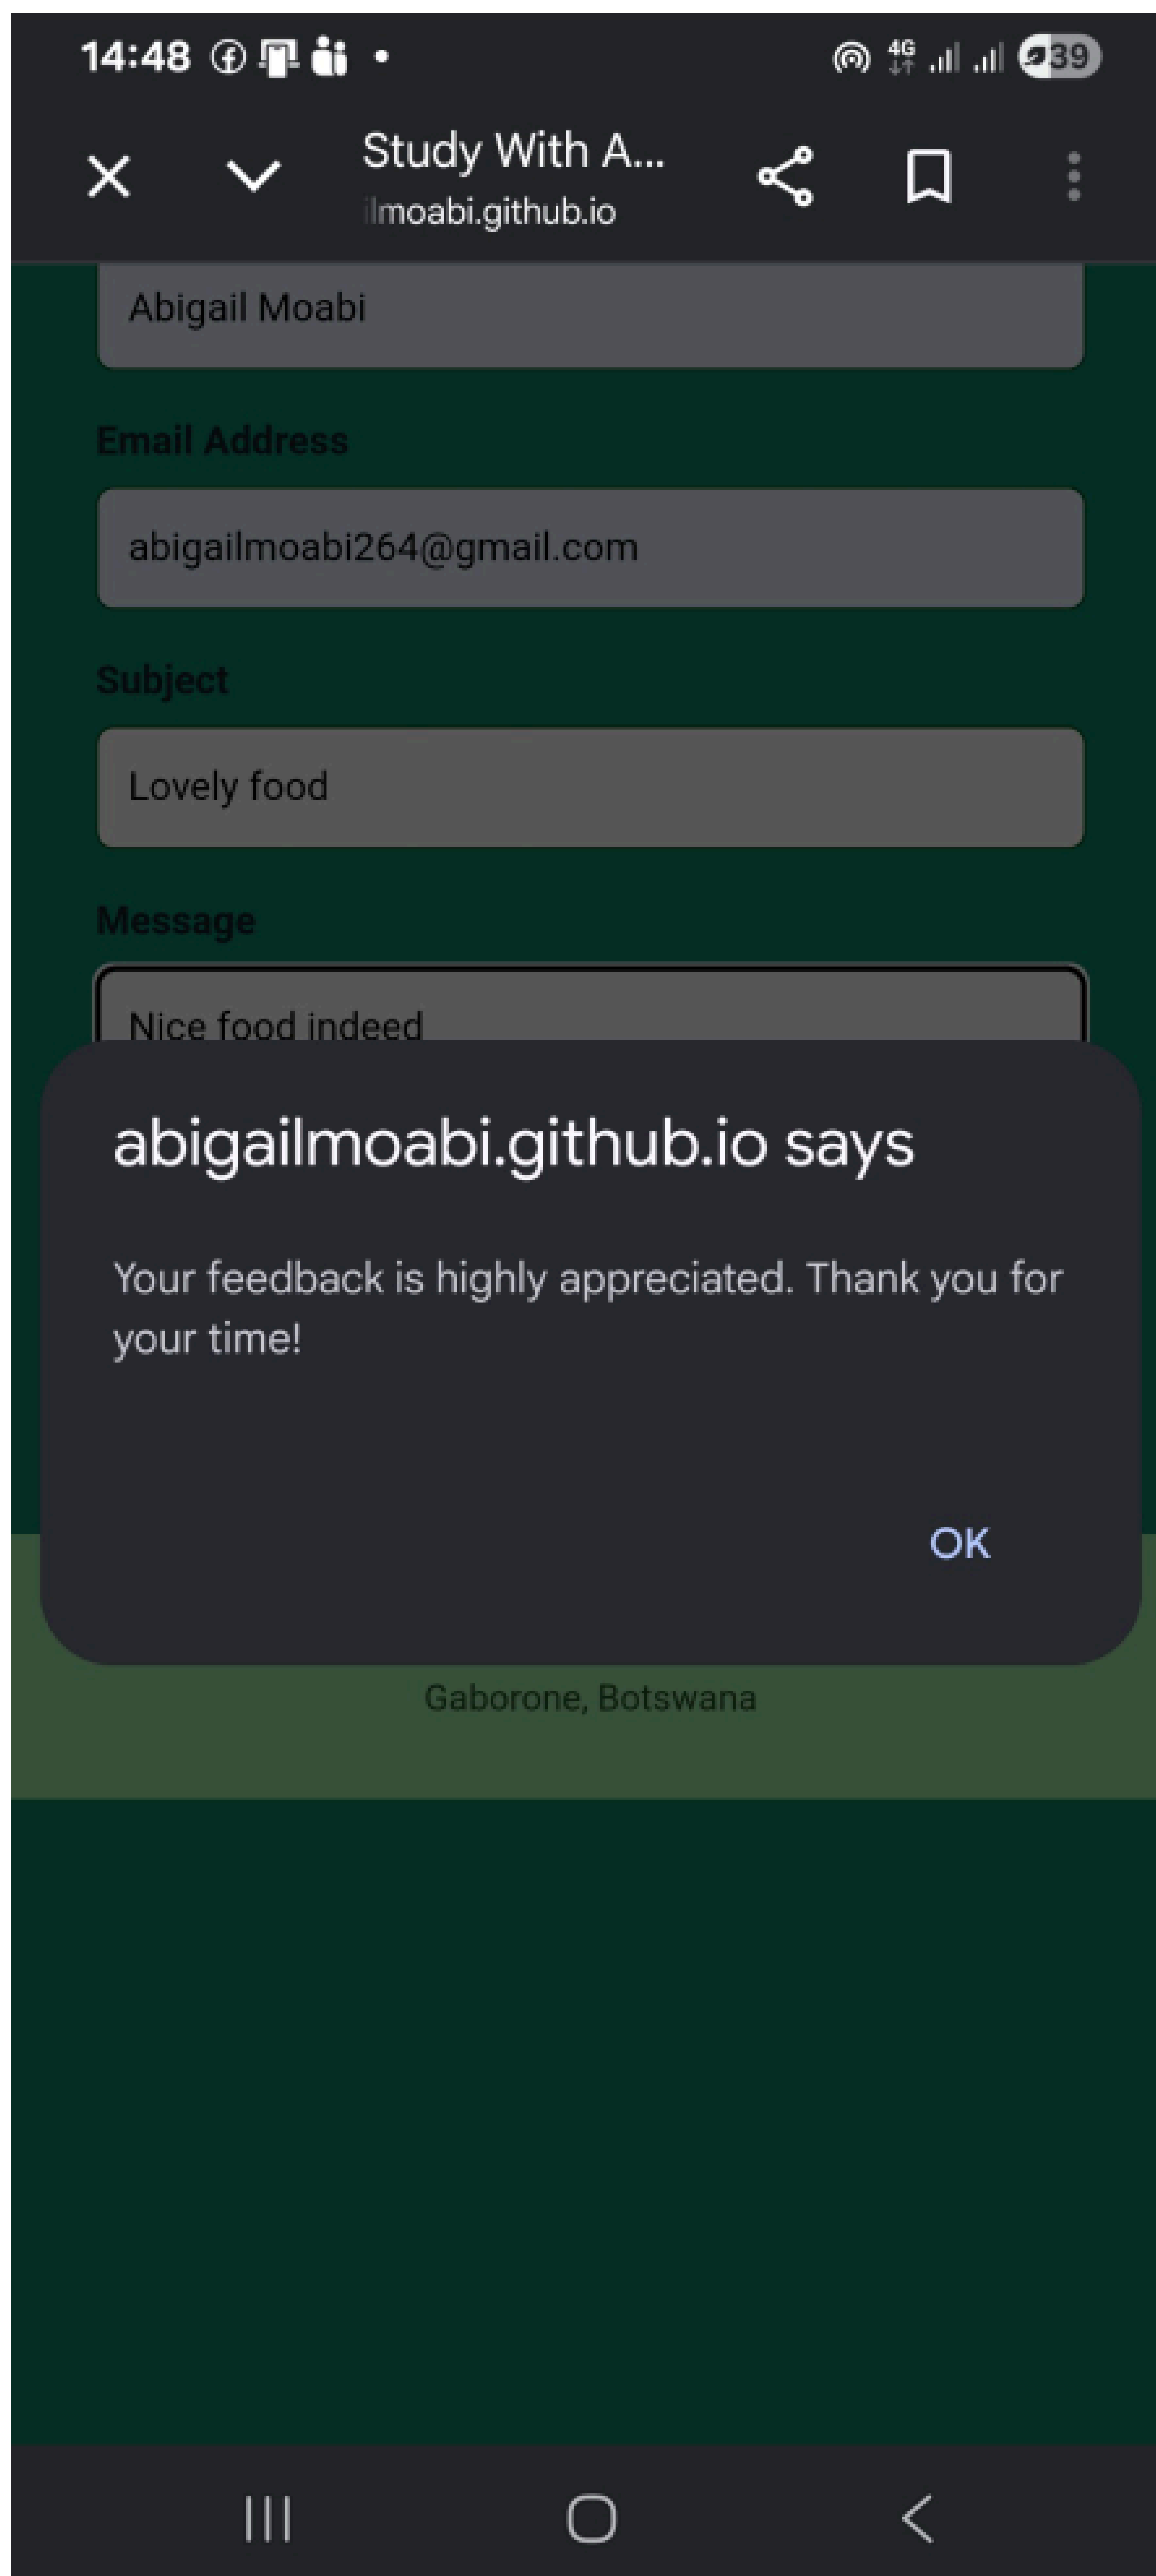

✓ **Quality Assurance:**

I tested the website on different screen resolutions to make sure it works perfectly.

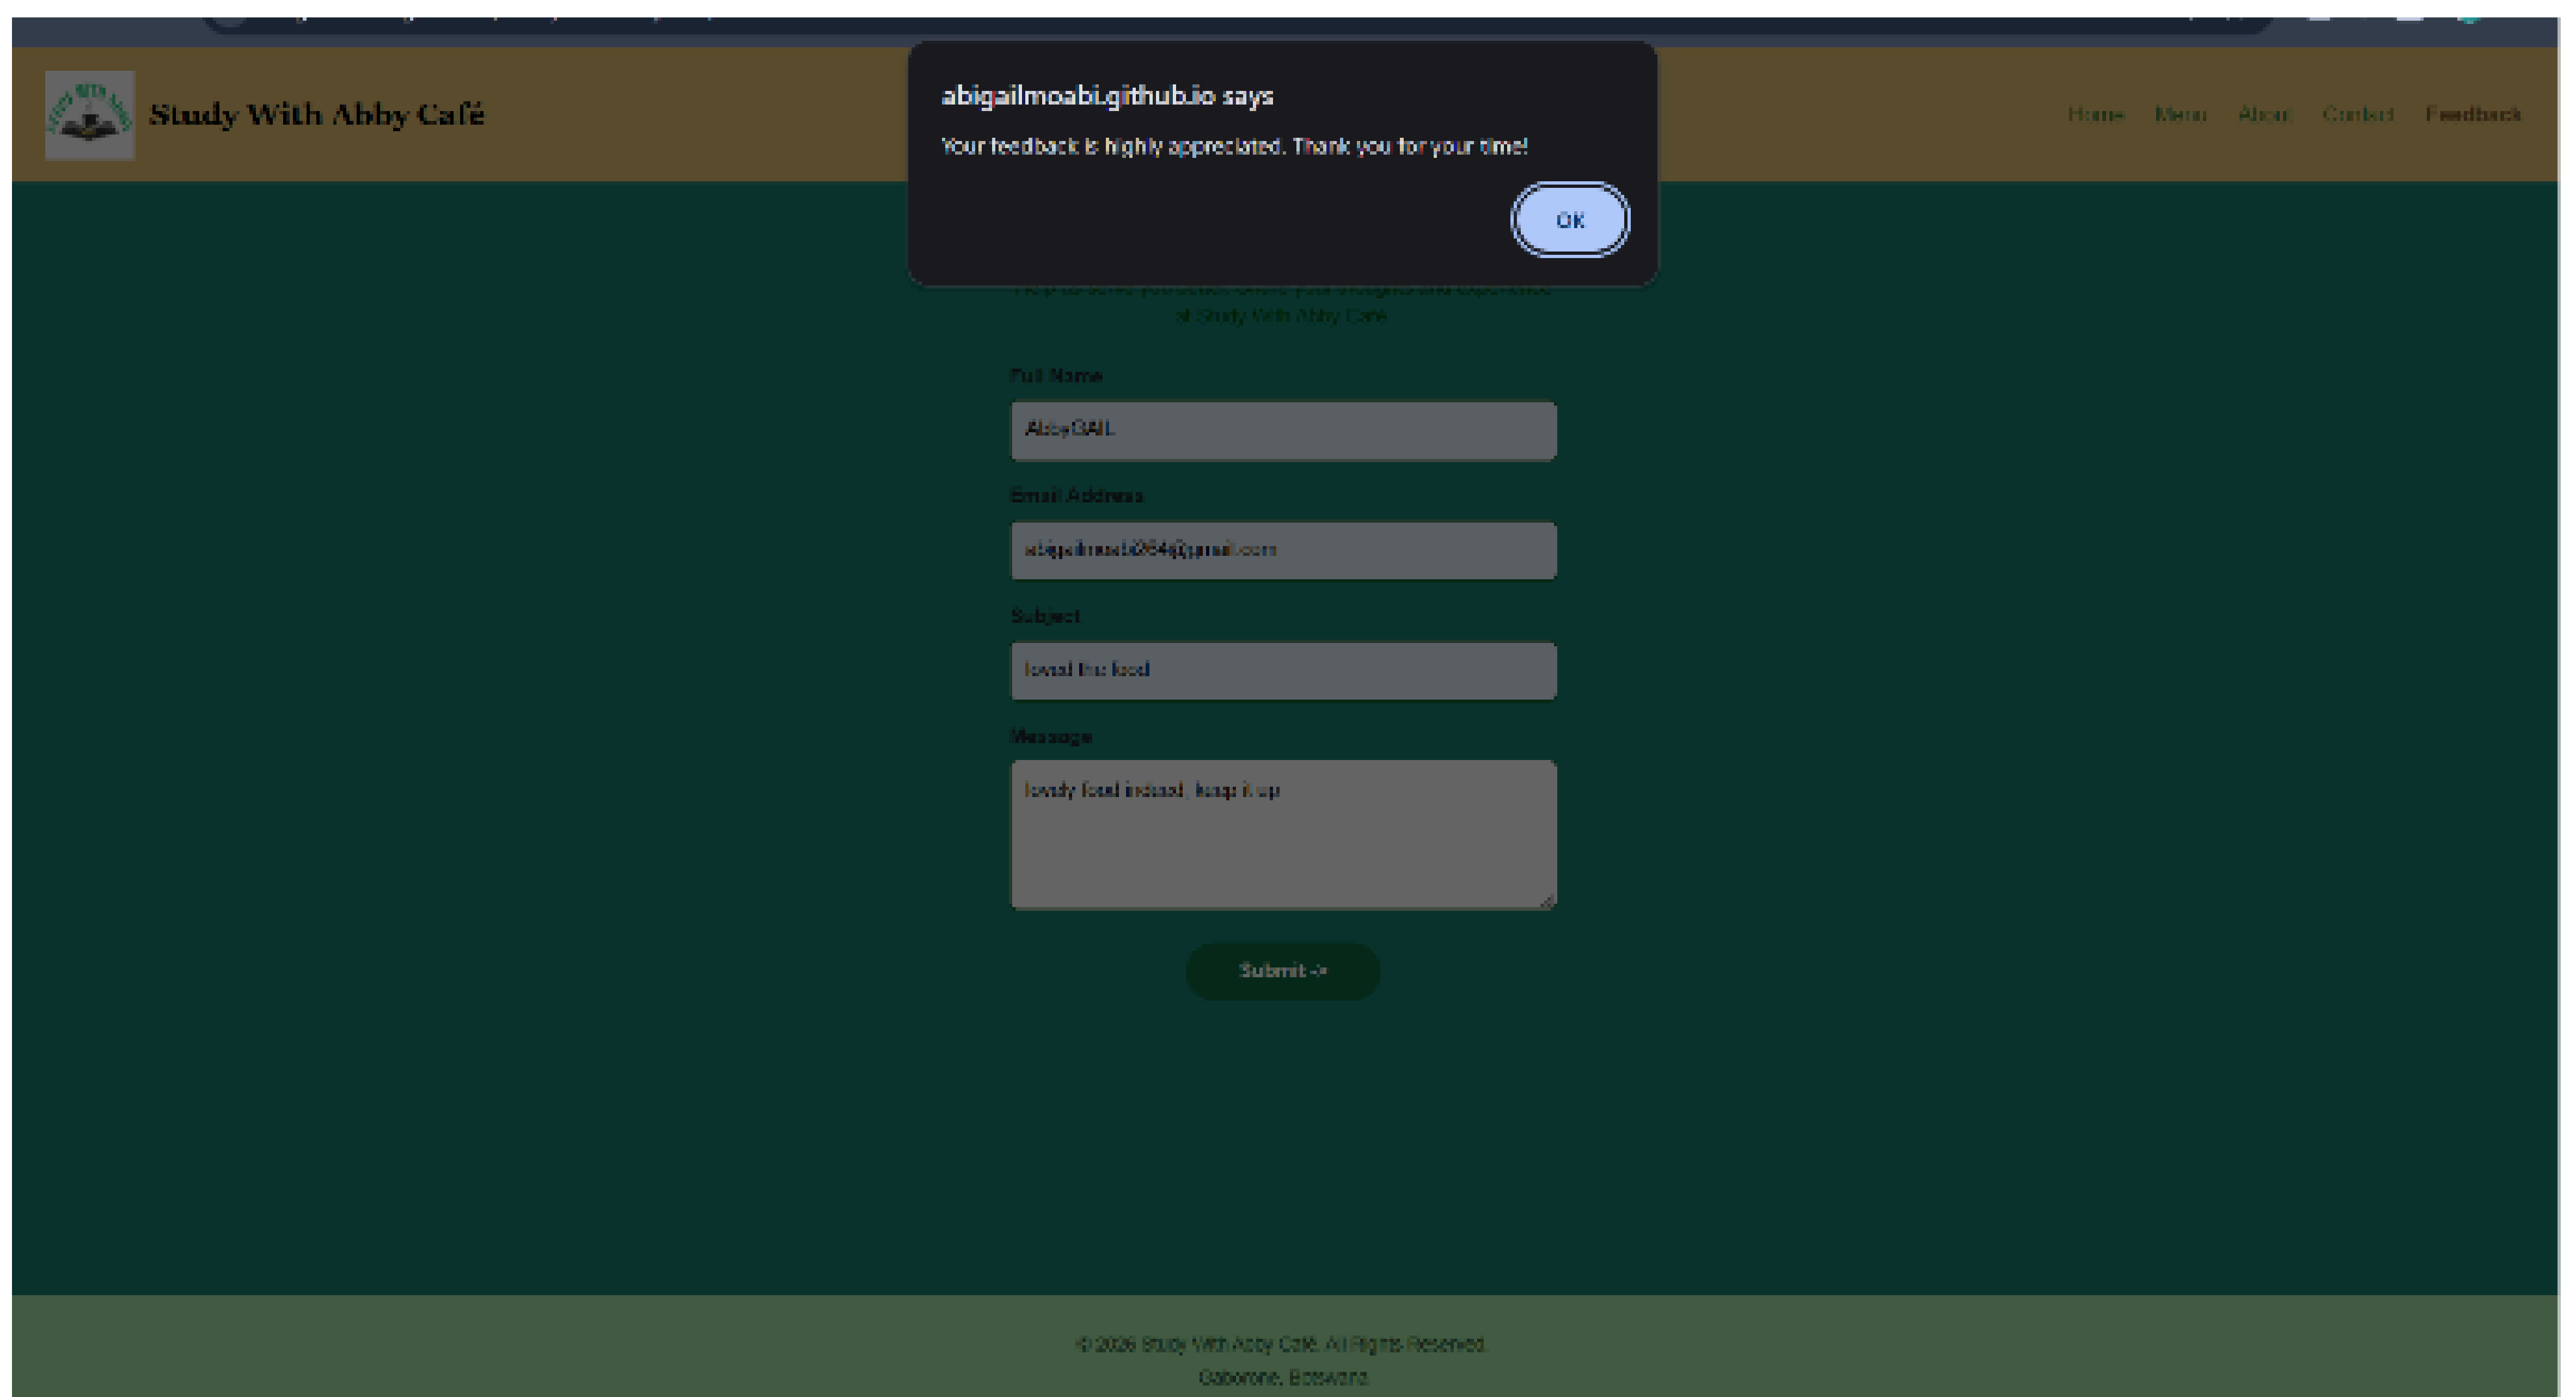

Here is a screenshot of it working on a desktop:

Here is a screenshot of the website working on a smartphone:

Here is a screenshot of a pop-up message after submitting the feedback:

✓ Publishing & Promotion:

Files are hosted live on internet via Git Hub pages and made public for easy access.

I will share the website link to LinkedIn and use my Pinterest Business account to

promote and drive traffic to the website.

✓ Future Developments:

1. The website will no longer serve as an informational toolkit only, but an e-commerce platform as well. It will allow customers to pre-order their food online right before arriving at the café so that when they arrive their orders will be ready.
2. I want to add booking feature to the website for the café's physical study space. If a group of students planned out to have a discussion session at the café and want a private discussion room, they can easily check on the website to see if any private discussion rooms are available at what time or not. They can book at a specific time to ensure that when they arrive at the café, they have a guarantee that the space is available for them.
3. Adding a database integration so that the data can be securely saved and managed. I will connect both feedback forms and booking forms to a backend database.

Who We Are

My name is Abigail Moabi, founder and lead developer of Study With Abby Café. A library is a great place to study but has some strict rules. For instance, you are not allowed to eat nor discuss within the premises. Sometimes that makes it hard for one to focus for long hours.

The café was born from the idea to make studying long lasting and enjoyable. The café provides comfortable space for studying, allows for discussions and one can order what to eat to keep the body fueled up and the mind active.

At Study With Abby Café we value good conduct to ensure customer satisfaction and are committed to offer the best services throughout.
